The Conference

During the past two years of our work we have continually observed the importance of family for its members, but also for the demographic and economic recovery of society. We have therefore organized the international conference “The Family: the Key of Demographic and Economic Recovery” which is to be held on the 22nd-23rd October 2015, at which renowned experts will present examples of good practice of strengthening and protecting the family.

We believe that every investment and empowerment of marriage and family always brings good both to the members of the family, and to society at large. The future of society (the wider community) depends on the family (the smaller community), i.e. on the quality of its members' lives, founded on the marriage of a woman and a man. Good family life directly affects the stability of marriage and family, the increase in number of educated citizens, the workforce, the economic and demographic growth, and it reduces violence, poverty, risk behavior... We have therefore decided, in cooperation with foreign organizations, to use this conference to show examples of good practice of investment and empowerment of the family, in which you can also participate and learn how to help families in a practical way!
