

“Dear Sir/Madam,

During the past two years, the organization “In the Name of the Family” has promoted the protection and strengthening of the family. In our work so far we have continually observed the importance of family for its members, but also for the demographic and economic recovery of society. We have come to realize that we need concrete people whose concrete projects will make supporting the family possible on all levels.

In order to answer this pressing need which the family and society are facing today, we have organized the international conference **“The Family: the Key of Demographic and Economic Recovery”** and we wish for it to be the concentration of the best knowledge about the family.

We will strive to initiate concrete projects together. It is extremely important that you join us as well. Our aim is to have more knowledge, more projects and more cooperators after this conference.

Join us!”

WHEN?
